

A COMPUTING SOLUTION FOR MANAGING SMALL AND MEDIUM-SIZED ENTERPRISES

CASE STUDY: GRUPO SOLUTIO

OVERVIEW

Country: Spain.

Sector: Human Resources, Technology, Construction and Industrial Services.

Client profile: Grupo Solutio consists of four companies: Solutio Consultores, Solutio Outsourcing, Solutio Industrial and Solujob ETT providing solutions for Human Resources, Technology, Construction and Industrial Services.

Situation: Grupo Solutio managed its companies' different processes separately, with various office software and specific management packs for some tasks (accounting and payroll).

Solution: With **XML Process Project Management** and **XML Process Invoicing**, Grupo Solutio has comprehensively standardised its main business processes for its four companies, taking into consideration the singularities of each process.

The complete solution has integrated XML Process with A3Nom to manage Human Resources and SAGE SP Contaplus Élite for accounting.

Execution period: 3 months.

Advantages:

- Standardisation and optimisation of the business processes in four companies.
- Follow-up on project profits in real time.
- Access to comprehensive management reports for the group.
- Centralisation and digitising of documents.
- Integration with specialised accounting and HR software.
- Traceability and control of processes and their periods.

"With XML Process we have obtained more detailed awareness of our management process. Now we can make better strategic decisions based on updated information from our projects."

Mr. Angel Largo. Managing Partner of Grupo Solutio.

CASE DESCRIPTION:

Grupo Solutio implemented **XML Process** to improve control over its projects and generate a real time profit analysis on them, taking into consideration the singularities of the different companies in the group.

Starting from the data on their accounting and payroll programs: A3Nom and SAGE Contaplus, **XML Process Project Management** was configured to integrate the data from both applications for a comprehensive **XML Process** solution.

Grupo Solutio uses **XML Process Invoicing** as a comprehensive invoicing solution for all of the group's companies. With this tool they can digitise all invoices from suppliers, allowing for centralised control over them, thus eliminating the management of paper copies. Simultaneously they can link their invoices with projects for a comprehensive **XML Process** solution.

Now Grupo Solutio can analyse its projects profitability in real time and make decisions based on all of the information in its processes, comparing sales previsions with real time data on costs and invoicing.

XML PROCESS is a product of R2 SISTEMAS INFORMÁTICOS certified firm in quality and I+D+i
